COLEMAN, ALBERTA, FRIDAY, MAY 4, 1934

\$2 per year, single copy 5c.

## W.U.L. Shifts Activities to Michel

News of Michel mine workers affiliating with the Workers Union League, and its subsidiary remnant of the Mine Workers Union of Canada, of which Murphy, Sloan and Stokluk are the principals, caused considerable comment among those who voted against allying themselves with the outlaw organization.

Quite recently Michel workers negotiated a year's agreement with the Crows Nest Pass Coal Co., following which Murphy agitated among them with the result that a vote was taken on a show of hands, it is reported, in which unemployed were included as well as men from relief camps.

No record of a ballot vote has been given in news reports. Michel mine workers usually have a May Day celebration, and apparently in order to give strength to Murphy's influence, he decided on a demonstration at Michel to impress the workers. Since the advent into the district of the Workers Union League organizers they have held demonstrations at Blairmore on May Day. This year the United Front shifted its activities to Musil's farm a few miles across the border in British Columbia.

All this is in keeping with past tactics. Dominating Blairmore town council and school board, Murphy and his cohorts discovered in Michel a stamping ground which apparently gives the impression of being a good recruiting ground, though reports indicate that many of the mine workers regularly employed knew very little of the vote reported to have been taken whereby affiliation was sanctioned with Murphy's organization.

Reports also indicate that there is some dissatisfaction at Michel owing to working conditions. It is not known if the company has given any answer to the demand that they recognize the Mine Workers Union of Canada.

## COLEMAN WINNERS AT CRANBROOK MUSICAL FESTIVAL

In senior open violin, John Pietraszko, first; Elizabeth Moores, class under 17 years, second; W. J. Harris violin quartette tied for third place with Coleman violin quartette under J. Pietraszko; Blairmore String Quartette under Mr. Upton won second place; Hillcrest Quartette under Mr. W. H. Moser were first.

Jeann Cruickshank of Hillcrest tied with J. Pietraszko in senior open violin, and later played the same piece in the championship competition, the former winning by two marks.

Hillcrest Orchestra tied with Cranbrook Symphony Orchestra, a notable achievement considering the age and experience of the Hillcrest players.

## Local News

Jesse Hirst has built a new house in Grafton.

The rain and snow of Monday has given gardens a good start.

Miss Irene James arrived home on Sunday morning from Edmonton University.

Palace theatre is featuring "Flying Down to Rio" with a matinee and two evening performances on Saturday.

Mr. and Mrs. J. Derbyshire and son Jack accompanied by Mr. and Mrs. J. Hirst motored to Fernie on Sunday.

Mr. and Mrs. Wm. Bell motored to Calgary last week on a business trip and were accompanied on the return trip by Mrs. R. Fairfull of Calgary.

**Punch:** A telephone instrument which leaves both hands free will soon be available to the public. It should be a great boon to those who use both hands in talking.

To lift an ocean liner the size of the Empress of Japan would require the concerted efforts of every man in a city of the population of Chicago. Ten of Montreal's most celebrated piano movers will however be all that is required to place a model of the Japan in a moving van and deposit it in the concourse of the Windsor Station of the Canadian Pacific in that city.

## Comments on Current Events

Comment has been made on several occasions by mine workers of Coleman on The Journal's urging people to spend their money with Coleman merchants.

Also, comment has been made to The Journal that though this is a coal mining town, they notice trucks delivering goods which are to be sold to the mine workers. They ask, is it consistent to not only set a bad example, but also instead of helping the coal industry, to destroy trade?

One mine worker pointedly asked, what is the Board of Trade doing about it? Coleman merchants know full well that a resolution was voted on pledging their intention to ship by rail. This mine worker checked up on truck deliveries, and informed The Journal how many places were receiving goods by truck.

A Board of Trade has no more authority than has any other organization to keep people to their pledges, but its efforts count for nothing to promote industry if merchants do not support it, and act in reverse to it. There is room for much serious consideration, for it affects the miners union and doubtless will be the subject of discussion. When people's livelihood is being continually undermined they sit up and take notice in a rather forcible way. There is no better way to promote disintegration of local trade than by setting a bad example. It acts individually and collectively. A few pennies may be immediately gained, but hundreds of dollars will be eventually lost.

The Red Cross is kept alive in Coleman by the work of Miss Yuitl, principal of Cameron school, and her willing band of little helpers. Their example is worthy of more than passing notice. Children of many nationalities are banded together for the common good, and at the same time are receiving lessons in Canadian citizenship. There are things in school life of greater importance than just lessons and learning to repeat what is taught. What kind of citizenship are being made is a question that may be pondered over, teachers as well as school boards. In an enlightening article "Why Are Teachers?" by Don Herold, formerly a staff writer on the Brooklyn Eagle and other dailies, dealing with influence of teachers, and reprinted in the Readers Digest, he concludes: "To heck with the books, here is a soul on our hands—and yours."

Oxford Groupers will address people at all churches in the Pass towns over the week-end. From Calgary and Lethbridge, enthusiasts of the movement, including men, women and young people, will tell people the benefits they have received from this world-enriching movement which aims to make life more honest and happier. They will likely be greeted by big attendances, as the majority of people are looking for inspiration and greater vision in grappling with problems of life.

Boys and girls are entitled to horse bicycles or other means of amusement. But horses eating up shrubs and lawns constitute a nuisance to people who spend time and money beautifying their premises. Orders have been issued to prosecute owners of animals running at large in the town. Plenty of warning has been given, so that ignorance cannot be pleaded. Co-operation on the part of everyone concerned avoids hard feelings and may be a fine and costs. The best way is to observe the law and respect the rights of others.

## ST. ALBAN'S CHURCH NOTES

The evening services at St. Alban's on Sunday (7 p.m.) will be addressed by Oxford Groupers who are visiting the Pass towns. Visitors will be welcomed.

Cole's theatre big week-end attraction Friday and Saturday is "Counsellor at Law," with John Barrymore, Bebe Daniels and Doris Kenyon starring. It is based on Elmer Price's successful stage play.

## Most Especially Conducted

The Captain and the crew, the ship's Doctor, and more particularly the kindly, motherly stewardess of the Canadian Pacific liner Montclare all shared the responsibility of personally conducting the recent trans-Atlantic journey of Mary Estella Barr, of Halifax. Mary Estella has six months of very active life behind her, and the best wishes of the Montclare's personnel for many happy years to come. The journey was necessary because Mary Estella is motherless, and her father, Peter Barr of Halifax, though unwilling to part with his baby daughter, yielded to the wishes of his parents in Leth, Scotland, to send the baby to them. Her grandparents met her at Glasgow.

## Be Kind to Animals

"Be Kind to Animals" week was recently observed by humane societies. For years efforts have been made to educate people to the cruelty of trapping, performing animals and other forms of torture to which dumb animals are subjected. One of the most forceful articles against the cruelties of trapping was noticed in the last issue of "Our Dumb Animals," in which a boy going his rounds of the trap line, was himself trapped by a log falling on him.

Here is part of it published for the benefit of the younger people: "I must keep calm" he told himself. "My ankle is caught, and this log pins me down. Maybe I can cut through it with my knife." But in half an hour he had cut only a small nick in the hard log, and his hand was blistered and bleeding.

"I'll starve to death before I get free this way," he muttered. "Gee, I'm thirsty. I wish my ankle would stop hurting. Say, it's getting awful dark, and nobody knows I'm here." Desperately Pete kept cutting, and then, in the dark, his knife suddenly slipped and was gone.

There were very noises around him now. Something crept along the log that held him. He shouted, and it crashed away through the bushes. And then he heard something big crashing towards him. "A bear?" he wondered. "A wolf?" "Peeeee-ter!" Pete gave a high sigh of relief. "Yee-hooooo!" Up here, John!" he called. "Yee-hooooo!"

And presently there was John Hubbard with a lantern. "When your folks telephoned you were lost, I figured you'd be up here," John said, as he freed Pete. "Sprained ankle, eh? How does it feel to be trapped—alive?" "Awful!" Pete groaned. "Ouch! I can't stand!"

"Supposin' I'd waited till morning?" John said. "Up on my back you go. I'll have to carry you home. How about all these traps?"

"I'll come for them when my ankle is better, John," Pete said. "I'll dump them in the lake. Just so nobody else can use them either." "Our Dumb Animals."

Murdo Morrison journeyed to Coleman Saturday to try conclusion in the boxing ring with a chap from Medicine Hat named Harvey "Cowboy" Jesse. Murdo won the decision after ten rounds of torrid battling. A black optic and a cut on the lip were Murdo's moments of the fight, but a pleasant grin showed his pleasure at winning the bout anyway. Morrison stated it was one of the hardest battles of his career. Jesse after the fight decided to go back to the ranch and resume his leather punching as easier on the complexion.—Kimberley Courier.

## Local News

Born to Mr. and Mrs. J. Smith on Thurs., April 26, a daughter.

James Ford town clerk, is off for a week, having been suffering from a severe cold.

Mrs. Frank Graham drove a few of the Brownies out to Crows Nest lake on Saturday where they passed various Brownie tests. Mrs. W. Williams also took some of the girls on a short hike to Beck's Finch.

William Plomer in a recent B.B.C. broadcast talk on Japan told about a Japanese student who, on being asked in an examination to say what he knew about Robert Louis Stevenson, got mixed up with George Stephenson, the railway pioneer, and wrote: "Robert Louis Stevenson was a famous writer who invented the steam engine, and because he suffered from a weakness of the lungs he was always known as Puffing Billy."—C.N. R. Magazine.

The Rangers entertained the Rovers on Friday night at the home of Mrs. C. J. Devine. Court whist was played, the prize winners being first an automobile accident on Blairmore Hillen Westray, Hillcrest, and Johnny James; consolation, Violet Wilson expenses, a collection was made around the stores, which combined with the remainder of the evening was spent in dancing.

One of Canada's best known and best loved railroaders died recently at Vancouver when Matthew G. Collins, Cooley paid a call on the hospital patients on Wednesday, conveying a message of good cheer.

## Schools Field Day Arranged May 28

Representatives Met at Coleman on Saturday to Arrange Details

An executive meeting of school teachers was held in Coleman school on Saturday morning when representatives from all Pass towns, with the exception of Frank, met to discuss plans for promoting the inter-school sports meet to be held in Blairmore. It was decided to hold the meet on May 28, or providing the weather proved unfavorable to postpone the meet to the following Friday, June 1. All events will be governed by the rules of the A.A.A.A. Age limits of 12, 14, 16, 18 years and over will classify all events instead of the former weight limits.

Another executive meeting will be held in Coleman next Saturday when final decision will be made.

## Everyone Can Help

A collection is to be taken at the bank on Saturday for the family of John Kuliv. Their little child was recently killed in an automobile accident on Blairmore Hillen Westray, Hillcrest, and Johnny James; consolation, Violet Wilson expenses, a collection was made around the stores, which combined with the remainder of the evening was spent in dancing.

Roanoke Times: It is said that milk dealers plan to replace their glass bottles with paper containers. Then what's to wake folks up in the morning?

## Grocery Specials

## Good Only May 4-5-7

CERTAINLY make an instantaneous appeal. Early Wednesday our mid-week specials kept the store busy. THRIFT compels people to save wherever possible and here is the place to stretch the dollars.

## Notice

On Saturday, May 5th, a representative of Heinz Co. will be in the store demonstrating Heinz Soup. We extend to you a hearty invitation to come in and sample the different varieties of Soups.

## Introductory Special—Saturday Only

Small size, 3 tins for 29c	Family Size, per tin 15c
Anglo Roast Beef, large size tin 15c	Brunswick Sardines in Olive Oil, 5 tins for 25c
Sweet Pickles, Thistle Brand, 36 oz. jars, each 30c	Heinz Pork and Beans in Tomato Sauce, 28 oz. tins, 2 for 35c

## Wheat Prices And Economic Experiment

International experts of the wheat advisory commission have been engaged, at Rome, in studying ways and means of raising wheat prices, and, according to press despatches of recent date, have reached decisions which will be submitted to the governments of the signatory countries for approval and, it is presumed, concerted action. Decisions, it is stated, must be ratified in time to permit their implementation by June 1.

Details of the plan which have emanated, so far, from the conference at Rome, are not complete enough to warrant analysis with a view to computing their effects. Apparently, however, it is proposed to employ a price-fixing system to regulate exports rather than the commoner process of regulating exports to control price fluctuations. Apparently, too, the intention is to base the minimum price of wheat on the relation between export supplies and the month to month demand, with the London quotations rigorously adhered to by the exporting countries.

Nothing has been said so far as to the price objective. Undoubtedly, however, unless it be the 63.02 gold cent price computed as the "average price of all parcels of imported wheat of all grades sold during each week in all the ports of Great Britain," the terms of the London agreement, as they apply to the exporting countries, will be rendered nugatory. This is the price which, according to the agreement, must be reached and maintained over a period of sixteen weeks, before scaling down of customs tariffs begins.

Western Canada awaits with interest and expectation complete details of the proposals drafted by the experts for submission to the signatory nations. Price, of course, is a matter of paramount importance to the farmers of the prairie provinces, and, if, by agreement, the world price can be raised and stabilized, a long step will have been taken towards stabilizing the agricultural industry in Western Canada. It is impossible here to talk of lowering production costs while debt and other charges remain as a high and uncontrollable overhead factor in them.

Of scarcely less significance to the prairie farmer is the matter of lower customs duties against Canadian wheat in the importing countries of Europe. If then, in addition to raising world prices, there is an adjustment downward of tariffs associated with wholehearted efforts by the importing countries to increase consumption of wheat and at the same time to reduce domestic production, western agriculture may assume with some hope of fulfillment and success, the task of orienting itself to the new economic objective. That is to say, if the spirit of the London agreement is observed to the letter of its various terms, there is no obvious reason why, once the curvatures are disposed of, Canada's export quota should not progressively increase pari passu with her ability to consume the products of industries indigenous to her best customers. Signs already are conspicuous that the ultimate determinant of positive or negative reaction to the terms of the London agreement by the importing countries will be the "balance of trade".

Throughout the world, a series of exceedingly interesting and vitally important economic experiments are underway, with the various nations engaged in concerted efforts to set their own productive processes in order. The United States is seeking prosperity and stability through the agency of the Roosevelt "New Deal". Mussolini has his corporative state with industry, organized on a national basis, acting as "economic advisor" of the government. Germany is essaying recovery through a process of state intervention, and Austria apparently is preparing to adopt the Italian model. Russia, of course, is adding to gear the productive machine to the needs of her people, through socialization. In Britain, the means for recovery is styled "rationalization". All the experiments have one element in common—government intervention, government control and government regulation. The same trend is patent in Canada, for recent legislation has laid foundations for a wide range of machinery for control and regulation, which is to be created and made operative as conditions demand.

### Value Of Birds

Rev. B. F. Henry of Pratt, Mass., in placing the value of the various species of birds, said the meadow lark was worth \$2 each. "The robin," he said, "is worth its weight in gold." In setting the value of the robin, Rev. Henry declared that it is a great work in eliminating garden and lawn pests, while the meadow lark also helps the farmer by assisting in ridding his fields of the smaller pests.

### World's Cheapest Air Route

The world's cheapest air service has been inaugurated between Glasgow, Belfast, and London. The service will cost passengers not more than a penny a mile. Equipped with two motors of 460 horsepower each, the planes will carry 15 passengers and two pilots. The Southern Railway Company is now operating an air line between Croydon and the Isle of Wight.

## Smothering Sensations Faint and Dizzy Spells

Those feelings of faintness; those dizzy spells; those all-gone smothering, sinking sensations which come over people, from time to time, are warnings that should not go unheeded. They indicate an extremely weakened condition of the nerves and other vital organs, and should be given immediate attention. Those suffering in this way will find Milburn's H. and N. Pills a remedy with which to recuperate their health, build up their run down system, and bring back their bodily vigor. Ask your druggist for Milburn's H. & N. Pills.

### Thousand Miles An Hour

Astonishing Things Predicted By Sir Charles Kingsford-Smith

Whirling through the stratosphere at well over a thousand miles an hour in the hermetically-sealed cabin of a giant air liner, guided entirely by wireless control stations on earth, can you imagine the possibility. Sir Charles Kingsford-Smith, hero of the recent record-breaking flight to Australia, believes this not only possible, but likely. In an astonishing vision of aerial development within the next fifty years he foresees air travel brought to such a pitch that ships and railways will become obsolete, their sole use being as carriers of heavy freight.

"There will be no human pilot, but gyroscopic control," said Sir Charles. "The huge flying liners which will move through the stratosphere at a uniform speed of 1,200 miles an hour, carrying 100 passengers in their luxurious cabins, will be fitted with super-efficiency, super-charged engines and variable pitch propellers.

"Risk will be negligible. Each plane will have ten, twelve or fifteen engines, all in the event of one cutting off, the officer in charge will simply detach that engine from the propeller while the mechanics repair it in route. Crude oil will probably be used as fuel."

Actually, to accomplish the amazing speed of which Sir Charles speaks we do not require more powerful engines than some already built. The atmospheric density 60,000 feet above the earth is about a quarter of what it is here, so that an engine, which under normal conditions to-day attains the high speed of 350 miles an hour, would hurtle through the rarefied atmosphere at 1,400 miles an hour.

### Rich Collection For Museum

R.C. University Receives Rare Specimens From Dr. Fraser

The University of British Columbia will be enriched by a collection of hundreds of species of marine life, many hitherto unknown to science as a result of an 8,500-mile cruise through the south Pacific by a scientific party of which Dr. C. McLean Fraser, professor of zoology, was a member.

Dr. Fraser returned to Vancouver after an absence of three months. He declared that the expedition involved very little romance, but much hard work. He expects the discoveries made in the comparatively virgin scientific field off the coast of South America will have important bearings in the study of marine flora and fauna.

The specimens collected ranged from snakes and monkeys found on shore to sea serpents, brilliantly tinted "angel" fish and crustaceans. Dr. Fraser, being a world authority on a minute form of sea life known as hydroids, brought back a large number of formerly unknown types for the university museum.

## PRICES RISE BUT TEA STILL MOST ECONOMICAL

Three years of disastrously low prices for tea finally goaded the growers into action and committees were formed a few months ago to control production. Prices have already advanced and as soon as merchants have exhausted their present stocks the housewife will have to pay slightly more for her favourite beverage. Finest teas such as "Salad" still produce about 5 cuns for a cent.

### A Double Nourishment

New Flower Developed By Successor To Luther Burbank

A double nasturtium that "looks like an azalea and ranges in color from lemon yellow to scarlet," has been developed at Philadelphia.

It was created by David Burpee, who has continued the work of Luther Burbank in developing new varieties of plants.

The new flowers have attracted considerable attention at the recent local flower shows, where they have been called "the poor man's orchid."

### Teaching "Jiu Jitsu"

Miss Dorothy Curtis, recently returned from Japan where she has been teaching school for three years, has enrolled for her first year at the University of Wisconsin. In order to help pay expenses, she has organized a "jiu jitsu" class for girls. Miss Curtis, proficient in the art herself, says she has some promising students.

First book printed in America was the "Escuela Espiritual de San Juan Climaco"; no copies are known to be in existence.

### Yacht Cup Race

Mrs. Sopwith Will Act As Timekeeper On The Endeavor

Mrs. T. D. Sopwith, who will act as timekeeper on her husband's challenging yacht, the Endeavor, when it attempts to wrest the America's cup from the United States this summer off Newport, R.I., is anticipating the thrill of her life.

In every race of the series she will stand close beside Mr. Sopwith at the wheel, a stop-watch grasped in either hand, advising him to the second the time the Endeavor has made on each leg of the run, the time of its opponent, how they stand. It's important.

"I wouldn't miss it for anything in the world," she told the Associated Press when interviewed at the Sopwiths' handsome town residence in Park Lane. "I always act as timekeeper in our races, but this, of course, will be the biggest of all."

"You may be sure I won't wear trousers," she said. "Just a skirt and blouse and jacket. If there's a heavy sea I have a waterproof."

### Historic Treasure Prized

Old Sword Once Flashed At Battle Of Waterloo

An historic sabre that once flashed in battle under the colors of King Louis XVI. of France is a relic highly treasured today by Auguste de la Tremouille, who was established at Montmartre, Saclay, 1893.

It is the sabre of Baron de la Villehucq, Louis XVI's grand-uncle, who was breveted lieutenant by Louis XVI. in 1785. The baron took part in all the campaigns of Louis XVI. from the march to and from Moscow, the battle of Waterloo and the defeat of Bonaparte. He died in 1836 and the sabre passed on to Tremouille.

The 84-year-old pioneer of this little village near Paris, France, in 1873 and established his home at Chrysostom, Chautauque county, Quebec. He moved west 20 years later.

### Light Refreshments

Police Of New York Evidently Have Hearty Appetites

New York's "Finest" may not be either wealthy or wise but they are certainly healthy, judging from the recent exploit of 4,000 policemen.

On a special occasion these "Coppers" had breakfast together recently and here is what they are reported to have eaten: 3,000 grapefruit, 1,200 pounds of oatmeal, 24,000 eggs (scrambled), 2,500 roast chickens, 4,500 pounds of potatoes, 12,000 sausages, and 1,000 pounds of sugar.

This light snack was washed down with 900 gallons of coffee, 800 quarts of milk and 1,250 quarts of cream.

If the reader chooses, he can figure out the exact share of the average policeman for himself.

### School Age At Eight

Children should not be permitted to go to school until they reached the age of eight, in the opinion of Dr. Laurence P. Polson, president of the New England Council of Optometrists. "The eyes of the human being," he says, "do not reach the state of maturity until the child is eight years of age, and much of the unnecessary strain to which we subject the eyes of children in the classroom should be avoided to insure healthy eyes among the future generations."

About two-thirds of the road mileage in the United States still rates as "unimproved."

The Caspian sea is the world's largest inland sea.

It is estimated that the world's population is increasing at the rate of one per cent per year.

The Caspian sea is the world's largest inland sea.

## Agricultural Notes

Many Items Of Interest To The Western Farmer

In Canada the European earwig is found only in the province of British Columbia.

The major commercial areas in Canada producing table stock swede turnips for export are Ontario and Prince Edward Island.

According to prevailing estimates the Canadian sugar beet acreage in 1933 was about 2 per cent lower than in 1932.

The total annual production of clovers and grass seeds in Canada has remained about the same in recent years.

Canada has a world-wide reputation as a producer of aliske, Ontario seed having dominated world markets in quality and price for many years.

The Canadian milling industry provides a market for about 15 million bushels of Canadian grown barley in the manufacture of food products and feeds.

There appears to be a good future for certain varieties of prunes grown in Canada for drying purposes. The imports of prunes in 1932 fell to \$565,327 from \$717,525 in 1931.

The expansion of tobacco production in Canada from 13 million pounds in 1921 to 54 million pounds in 1932 has given rise to difficulties in marketing the crop to advantage.

Green, wax podded beans, and also beans for baking, are staple products for which canner requirements depend upon crop conditions and carry-over, the domestic demand being fairly constant but the export prospect small.

In Eastern Canada many farmers who some time ago went out of sheep on account of poor fence protection are now in a position to go into sheep raising again, wire fencing being gradually substituted at a moderate cost for rail fences.

The Canadian milling industry furnishes an outlet for a relatively small amount of high grade malting barley grown in Canada. This demand has increased steadily in recent years, and in 1932, 5,441,000 bushels of barley were used by malsters.

The commercial production and demand for broom, western rye, and crested wheat grass seeds is practically limited to the prairie provinces, where last year 900,000 pounds of broom, 225,000 pounds of western rye and some 3,000 pounds of crested wheat grass commercial seeds were produced.

The increase in the 1933 potato crop in Canada over 1932 is partly due to increased acreage and partly to higher yields per acre in certain provinces. The 1933 crop is estimated at 41 million cwt., which is four per cent above 1932 and 10 per cent below the 1928-32 average production.

The acreage and tonnage of grapes in Canada has shown a steady increase since 1920. The future of the grape market is bound up with the wine industry, as the productive acreage of grapes in Ontario will over-supply the fresh fruit markets and the apparent winery requirements.

The increase in dairy cow and heifer population in the Western provinces points to a continuation in 1934 of the level of dairy production reached in 1933, providing that the range in relative prices between dairy products and beef remains the same. The Agricultural Situation bulletin.

### Like Good Old Days

Useful Home Production Idea Revived By Alberta Settlers

The "good old days" have come back to the rural district of Erskine, Alberta, with a return to useful home production. The same engine which has chopped a generous supply of wood for the summer months also runs a chopper that grinds wheat into breakfast food. From hides men fashion everything from moccasins to coats.

Sugar beets provide syrup which, combined with yeast, gives the settler vinegar, and women, so prolific in the knitting of socks, sweaters and caps, have revived talk of the old spinning wheel.

A lifeboat has been designed which is equipped with rotating rims at bow and stern on which it can be slid down beside of a ship safely no matter what the ship's position may be.

Six out of ten people have one leg shorter than the other, according to a noted physician. Is that why they run around in circles?

I DREADED THE THOUGHT OF GREASY POTS AND PANS UNTIL I USED

It cuts through grease—makes messy kitchen jobs easy!

DON'T be a slave to kitchen chores. Just use a solution of one teaspoonful of Gillett's Pure Flye dissolved in a quart of cold water. It puts an end to stubborn stains. Lifts grease and grime off like magic!

Gillett's Flye is indispensable for all your heavy cleaning... for stop-up drains... for toilet bowls. Order a tin from your grocer today. Say good-bye to hard rubbing and scrubbing!

\*Never dissolve Flye in hot water. The action of the Flye itself heats the water.

FREE BOOKLET—Be sure to get the new revised Gillett's Flye Booklet... it tells how this powerful cleaner and disinfectant will lighten dozens of household tasks. Contains full information for soap making, thorough cleaning and other uses on the farm. Write for free copy to Standard Brands Limited, Fraser Ave. & Liberty St., Toronto, Ont.

# GILLETT'S FLYE EATS DIRT

For War Prevention

A resolution asking government control of key minerals as a method of war prevention, endorsed by the Vancouver Women's Canadian Club and the Calgary Business and Professional Women's Club, will be sent to the League of Nations Society, at Ottawa, for further action.

33 RIT COLORS

Get exactly the color you want from the new Instant Rit range... instant, because it dyes right and STAYS... never leaves streaks or spots... and makes everything you use it on positively lovely.

W. N. 17 2044

## Make New Move In Effort To Improve World Wheat Situation

London. A new move in the effort being made by different governments to improve the wheat situation will be made when the world advisory wheat committee assemblies here May 7.

The London agreement of August, 1933, aimed at improvement by finding an equilibrium between production and consumption. The forthcoming meeting will work directly toward increasing the price of wheat.

Minimum price fixing for different grades of wheat in the principal shipping ports of the world may appear as a new arbitrary intervention.

In order to simplify their task, the world wheat advisory committee is preparing two tables which will be the basis for a system of control of prices. The first table will contain the price of the different kinds of wheat quoted by Canada and the other various export points of each country.

A permanent committee of four experts will be able to follow the variations in prices through use of these tables and advise the committee as to the measures necessary to maintain minimum prices at the points of shipping. Governments must agree the prices in the interior will be equal to the minimum export prices.

If it could be rigorously controlled

### May Hold Conference

Imperial Meeting In London Suggested For Next Year

London.—In a special despatch from its Canberra correspondent, the Times said the suggestion had arisen during the visit of Stanley Bruce, Australian minister to the United Kingdom, an imperial conference might be held next year in London to consider questions of defence and economic policy in the light of the Ottawa agreements.

The newspaper said it being existed in Australia in view of an apparent standstill in disarmament negotiations the decline in empire defence had created a situation of grave importance.

### Freedom Of The Press

American Newspaper Publishers Urge Members To Be Vigilant

New York.—The American Newspaper Publishers Association unanimously adopted a resolution urging its members to be "increasingly vigilant" to protect the principles of the freedom of the press from impairment.

The resolution—watched closely in view of the fight waged by an A.N.P.A. committee for a free press clause in the daily newspaper code—avoided any criticism of the A.N.P.A. or United States government officials.

## Government Ownership Of Canadian Stockyards Is Suggestion Made

Ottawa. Government ownership of Canadian stockyards was proposed by Hon. George Hoodley, minister of agriculture from Alberta, when he appeared before the Stevens committee on price spreads and mass buying. The yards, he said, should be operated on a self-sustaining basis as public utilities, and the federal government could handle them better than provincial governments since it "had more money" to carry on the initial work. There would be no loss ultimately, he said, for the yards would carry themselves.

Mr. Hoodley further suggested an educational campaign to increase domestic consumption of wheat, and steps to buy greater quantities of manufactured goods from Great Britain so in the quid pro quo policy of that country it would not further restrict cattle imports from Canada.

He proposed the government should consider an "all-inclusive rate" on cattle shipments to the United Kingdom so ranchers would know definitely what their costs would be. There should be restriction of imports of meat, both chilled and canned, into Canada, he said. "The heavy import of meat into Canada is a thorn in the side of the meat producers here."

by government agencies this plan for improving prices would seem simple enough, but variations in the exchange, interest rates, commission rates, and other factors make price fixing a real mathematical problem.

During the last meeting of the committee in Rome, a majority of the delegates recognized the necessity of a strong initiative if the August, 1933, agreement was to have any results. The situation in world stocks was such, that the delegates foresaw an increase in wheat stocks as on August 1, 1934, and another increase in August, 1935.

Since the agreement was put into effect, it has been apparent some governments have not been able sufficiently to decrease acreage. The United States still has a sown acreage greater than that anticipated for this time. Argentina cannot yet consider a reduction.

Australia and Canada are taking steps to reduce the acreage sown. The U.S.S.R. has not yet agreed to limit wheat production and the "Big Four" would like to make some agreements with it to fix an export quota.

The stocks in European importing countries amount to 350,000,000 bushels, an increase of 100,000,000 over last year. France expects to import a small quantity of wheat in view of the forecast for a poor harvest in 1934.

### Loans For West

Federal Advances Announced For Western Provinces

Ottawa.—The Dominion has made a new loan of \$268,000 to Manitoba and extended past loans, totalling \$1,850,000, to Manitoba, Alberta and British Columbia. It was shown in orders-in-council tabled in the House of Commons.

Manitoba's loan will be used by that province to pay relief accounts which it has found impossible to meet from its own revenue. In addition, a Manitoba loan of \$300,000 was extended in the year.

Alberta received a loan of \$1,000,000 and \$500,000 for British Columbia also was extended.

### Motion Was Defeated

Committee Rejects Move To Restrict Head Bankers' Pay

Ottawa.—The house banking and commerce committee defeated a motion by William Irvine, U.F.A. member for Wetaskiwin, which would restrict the salaries of high bank officials to the amount currently received as salary by the prime minister of Canada. The committee also defeated a motion by the same member which would authorize bank employees to organize for the purpose of negotiating with their employers with respect to salaries, hours of work and general working conditions.

### Hopper War

Proper Temperature Only Needed To Develop Eggs

Saskatoon. Farmers and grasshoppers are engaged in a race in which the grasshoppers have now advanced 220 degree-hours in the Saskatoon district, according to H. M. King, in charge of the federal entomological laboratory here. The farmers must get their protective measures completed before the hoppers advance 5,000 degree-hours, he explains.

It all depends on the warmth. Half an inch below the surface of the soil, millions upon millions of grasshopper eggs are waiting. If the soil temperature remains below 62 degrees they will remain undeveloped indefinitely.

But above 62 degrees the eggs begin to develop and one hour at 10 degrees above 62 degrees produces as much effect as 10 hours at one degree above that point.

### Marooned Air Party Reaches Dawson Creek

Spent Winter In North After Plane Crashed Last August

Dawson Creek, B.C.—Marooned in the snowbound north all winter after their aeroplane crashed August 21 last in the remote upper half-way country near Cypress Creek, Captain C. A. Simmons, Mrs. Betty Rossbach and Pilot John Bonnell, all of Chicago, have reached Dawson Creek in their rebuilt machine.

The party was exploring the possibilities of landing places between Fort St. John and the "tropical valley" last August when the motor of the machine quit cold above Cypress Creek. It was completely wrecked in the crash but none of the party was injured.

### U.S. Navy Plans

Plan To Construct 20 To 25 Ships To Bring Navy To Strength

Washington.—Within four months the United States government expects to start building 20 of the 95 ships needed to bring the United States navy up to treaty limits.

President Roosevelt let it be known that the \$100,000,000 appropriation bill he will submit to congress shortly would provide money for initial construction in the treaty navy program.

That bill, said Chairman Carl Vinson of the house naval committee, will carry about \$40,000,000 for the first year's work on six submarines of 1,300 tons, 12 destroyers of 1,500 tons, and two destroyer leaders of 1,850 tons.

### Will Net Large Sum

High Price Being Paid To Trappers For Muskrat Skins

Prince Albert, Sask.—First it was hogs, and now muskrats are contributing their bit to the return of better times here. Within three days approximately \$25,000 has been paid out for skins and still they are coming in.

It is believed that at least 150,000 hides will be brought into the city within the next few weeks. These will net trappers approximately \$112,500. Prices are double what they were last year.

### BRITISH MINISTER OF AGRICULTURE WEDS

The Right Hon. Walter Elliot, British Minister of Agriculture, leaving St. Basil's Episcopal Church, North West, with his bride, the former Miss Katharine Tennant, half-sister of the Countess of Oxford and Asquith, after the marriage ceremony. Many members of Britain's nobility attended the wedding.

### ANZAC PREMIER

Prime Minister Forster of New Zealand, who has announced that a royal commission will be appointed to investigate the New Zealand dairy industry and that a probe will be launched in the United Kingdom into causes of a discrepancy between prices for New Zealand dairy produce and those of competing countries.

### Revolution In Wireless

Marconi Using Shorter Wave Lengths Than Any Yet Known

London.—A revolution in wireless communication may result from new experiments now being carried out by Guglielmo Marconi using much shorter waves than any yet known, the Morning Post said.

Senator Marconi is engaged in the first regular communication tests over distances of hundreds of miles between stations near Genoa and Leghorn in Italy, using wave-lengths of 50 and 60 centimetres.

The newspaper interviewed the inventor and was told the experimenters were obtaining "very fair reception, although not as good as we want."

There was no apparent difference between day and night reception on the new wave lengths, Senator Marconi told the newspaper representatives, but there were other variations the cause of which they had not yet discovered.

Senator Marconi added the new waves greatly extended the range and would probably be applicable to television. He concluded they would have this advantage, "That there would be no interference of any kind."

### New Party Alignments

Events Are Moving Behind The Political Scenes In Britain

London.—Behind the political scenes forces are moving to new alignments of parties preparing for battle.

Sir Thomas Inskip, attorney-general and true-blue Conservative, proposes creation of a new national party to fight Socialism.

Laborites meantime hail the recapture of the North Hammonds seat as an emphatic condemnation of the National government and endorsement of the Labor party program.

Liberals meet at Bournemouth to consider policy and plans of campaign.

Sir Oswald Mosley's Fascists claim to be rapidly gaining ground, although not represented in the house.

## Britain Warns Germany Against Cutting Off Payments Of Interest

### Assistance For Airways

Appeal Is Made To Government For Some Aid

Ottawa. An appeal was made to the government to give assistance in the way of contracts of some nature to the Canadian Airways, Limited. At a meeting with Hon. Hugh Guthrie, minister of justice; Hon. R. J. Manion, minister of railways; J. A. Richardson, president of the company; Sir Charles Gordon and E. W. Beatty, the situation was canvassed.

It was contended the company was doing a great work in the north in the development of mining and in making communication possible in the remote districts. The company had been hard hit by the loss of air mail contracts and it was suggested that some work be provided by the government.

The Canadian Pacific and the Canadian National Railways each put \$250,000 into one airways company. For some time reports have been current that the air mails would be resumed. It is understood the government took the company's request into consideration.

### Commonwealth Day

Labor Party Would Abolish Observance Of Empire Day

London.—Herbert Morrison, leader of the Labor majority in the London county council, announced a plan to abolish observance of Empire Day in schools under the council's control. Instead, he said, a commonwealth day would be observed.

Morrison said the plan would be placed soon before the council's education committee, because the Labor party desired the day, May 24, be celebrated "in no jingo or flag-waving spirit."

He said Commonwealth Day must not be an occasion for implanting in the minds of children feelings of militarism and racial superiority. "Rather shall it stimulate domestic love of country and a family feeling within the British commonwealth of nations, coupled, particularly, with a desire for that still wider family of fellowship of the whole of humanity through the League of Nations."

### Author Starts Court Action

Robert W. Service Plaintiff In Mortgage Case At Vancouver

Vancouver. Robert W. Service, the man who made the Klondike famous in rhyme and story, is a plaintiff in supreme court here.

Service, now residing in Paris, France, has started an action to foreclose a mortgage on a North Vancouver house, property because of alleged failure to pay \$553 taxes, insurance premiums and water rates. The principal sum is \$2,000.

### Seedling Almost Finished

Lethbridge. In the Lethbridge section of southern Alberta, 50 per cent of the wheat seedling has been completed and 24 per cent of the sugar beet crop is in the ground, with early sown beets showing in the rows. Seed is going into a splendid seed bed and rapid germination of all crops is expected.

## Believes World Wheat Problem Is Yielding To Co-Operative Endeavor

London.—"I am confident the world wheat problem is yielding to the patience and co-operative endeavor of the governments of both exporting and importing countries," declared John I. McFarland, of Winnipeg, as he prepared to return home.

Mr. McFarland was chief Canadian delegate at the world wheat conference in Rome which drew up a plan for a minimum world price for export wheat to be submitted to the respective governments. The conference is to resume at London next month, hoping to have received replies which will permit of drawing up a definite scheme that may be put in operation.

Mr. McFarland added, "the degree of unanimity we achieved at Rome augurs well for further success."

Meanwhile a protest against pro-

posals formulated at the world wheat conference to establish a system of minimum world prices for export wheat will, it is understood, be drawn up by a special committee of the London Corn Trade Association for submission to the British government.

Sir Herbert Robson, the president, addressed the members in the Merchant's hall of the Baltic exchange on the subject of the recent Rome conference, which is to be renewed in London next month to receive the views of the represented governments on the minimum price scheme.

The meeting was private but it was learned that following Sir Herbert's address it was decided to appoint a committee to draw up a protest.

It was despatched a short time before Dr. Hjalmar Schacht, head of the German central bank, declared in an address that the reich's position was such that it would not continue her payments in foreign exchange is no longer possible."

The Dawes and Young loans to Germany were made under inter-governmental auspices and are governed by agreements reached at a London conference in 1924 and at The Hague and Paris in 1930.

### Reduce Interest Rates

Legislation To Provide Against Excessive Charges To Borrower

Ottawa.—Legislation incorporating loan companies will be amended to provide against excessive charges to the borrower, Prime Minister R. B. Bennett told the House of Commons. A bill to amend the act incorporating the discount and loan corporation met with determined protests from H. E. Spencer (U.F.A., Battle River), and Humphrey Mitchell (Lab., Hamilton East), when it came up for third reading.

When it seemed the debate would be carried to considerable lengths the prime minister took the floor and suggested that the bill be sent back to the committee to amend the act which would set a reasonable maximum of the interest charge. Incidentally, he said, that another bill incorporating a loan company would receive the same treatment.

### No Joint Action

British Stake In China Greater Than Japan's

London. The result of the British representation to the Japanese declaration over the latter's "hands off China" declaration was in the hands of the government, but despite impatient queries in the House of Commons its substance remained a carefully guarded secret.

Although the government refused to make any statement for the time being there was some significance in the release from authoritative sources of figures showing that Britain's commercial stake in China is more than twice as great as Japan's, and way ahead of the United States investment.

This fact lent added weight to the authoritative information that Britain would not consider joint action with any other power in dealing with the new Japanese doctrine.

## Local News

Alberta's Arbor Day has been fixed this year for Monday, May 7th.

Rev. Father Lehman of Bow is land was a visitor here on Friday last.

Now is the time for a general paint up campaign, which vendors of paint might well give a boost.

You must put your heart and thought into action to produce results.

Adding machine rolls, 30c each  
Counter Check Books \$1.00 per dozen—Journal Office, Phone 209.

Total output of coal in the province for February was 362,870 tons a decrease of 135,476 tons from February of 1933.

The school board met on Friday last and it was decided to complete the laying of hardwood floors in Cameron school.

Faction-torn Blaimore is very much like a house divided. It prevents unity of action for the general welfare of the town.

Prize-winners at the L.O.L. whist drive on Wednesday evening were Steve Penny and Wyndham Jones; Mrs. J. Richards and Miss Turner. 20 tables were in play and additional people attended the dance.

With Murphy invading the bailiwick of Tom Uphill, labor member for Fernie and Michel, one may expect to see some fun, as Uphill takes second place to nobody when it comes to amusing the crowd with his wit and sarcasm.

Pass towns may experience heavy winds, but they do not suffer dust storms such as Saskatchewan had last week, requiring lights to be turned on in mid afternoon, while automobiles had to exercise extreme caution to avoid collisions. An Estevan newspaper reporting a musical festival contained the heading—"Sand and music fill the air."

Every time a merchant in a mining town such as Coleman, depending on use of steam coal on railways, ships in freight by truck, he is just doing a little bit more towards crippling his own business and the jobs of those who mine coal. A truck outside any merchant's door is a bad example. No coal for railways no business for Coleman. Remember it when you are tempted to ship by truck.

Mr. R. M. Roy, Alberta supervisor for Tuckett Tobacco Co. Ltd., accompanied by W. G. Short, district representative, of Lethbridge, was here last week making a vigorous campaign in the Pass towns to promote the sales of that well-known tobacco, "Buckingham," which has been widely advertised in magazines and has accordingly increased in popular favor. A feature of Buckingham fine cut and the pipe tobacco is that it is kept fresh so that local dealers may satisfy their customers. Their neat packages of new crop tobacco are on sale in every store handling smokers supplies, in the handy 10c package which bears a picture of Buckingham Palace, London.

The children of Cameron school, organized as a Junior Red Cross branch, by Miss Yuill and her assistants, gave an interesting entertainment in St. Alban's hall on Friday evening. The model of the Royal Scot, crack British express train, made by the children, went on an imaginary excursion, the younger members being passengers. A waxwork show, in which each model depicted a health rule, was well done, and the young performers are to be complimented on their performance. They were such a healthy group of children that evidently they must be following Red Cross rules in their daily habits. One child gave a review of the good work the branch has done in supporting the Junior Red Cross.

"Are those eggs fresh?" asked a lady customer, to which the clerk replied they were so fresh they were high way at 1 a. m. Tuesday, necessitating a tractor to extricate it. It was conveying equipment for Coleman airport camp from Calgary, so quickly that sometimes the goods are sold before the ad. has traveled half a block.

A heavily loaded motor van broke through a weak spot on Blaimore's highway at 1 a. m. Tuesday, necessitating a tractor to extricate it. It was conveying equipment for Coleman airport camp from Calgary, so quickly that sometimes the goods are sold before the ad. has traveled half a block.

## The Plain Truth

The Journal needs \$70 worth of advertising weekly to pay production expenses. This does not provide anything for depreciation or replacement of type and machinery.

For the past four years we have not averaged this though we have tried to maintain the standard of the paper on the same basis as if it were paying its way.

Such a condition cannot continue unless we can develop more business or else cut down on production expenses by issuing the paper in Bulletin form, whereby less space would be given to local news and general activities.

It is therefore asked that subscribers pay as promptly as possible, and that general advertisers recognize the fact that as a local newspaper is an asset which is of general interest, it must receive a sufficient volume of advertising to carry on in its present form. Three men have to be steadily employed, and their business is of some value to local business.

Daily and weekly newspapers are pre eminent as news and advertising mediums. People pay for them because they appreciate the service given. Anything given away is not appreciated, for people realize that something for nothing cannot be obtained without someone suffers or little or no wages are paid. The American Newspapers Publishers Association shows that of 187 free-circulation papers or "shopping news" started within the last 12 years, only 66 are still issued, a death toll of 64.7 per cent.

Reasons given for discontinuing some of the papers are: Lack of support by advertisers in 79 cities; did not get results for advertisers in 22 cities; did not pay promoters in 16 cities; no interest for readers in two cities.

When questioned by publishers as to reasons why they gave up advertising in free circulation sheets, 132 merchants said they did not produce results; 43 complained of poor coverage; 25 said the free circulations were good only for cheap merchandise; 24 found they did not interest readers; 19 found their own prestige was lowered by such advertising.

Advertisers also reported decreasing results with each succeeding issue of the "shoppers."

## Local News

## Here and There

The British Columbia Chapter of the I. O. O. F. held its "convention of age" meeting at the Empress Hotel, Victoria, recently, at its twenty-first annual convention. Premier Pattullo welcomed delegates from all over the province, and many distinguished guests were present.

The annual reduction in cost of summer railway travel under the heading of low summer fares, will be put into effect by the Canadian Pacific Railway on May 15th next, according to official announcement. The reduced fares will have extensive limits and stopovers.

Port Hope, on the south bank of the Fraser River, ninety miles from Vancouver by the Canadian Pacific, is a place where the Almighty has most lavishly set down in a land of wonderful beauty rivers and lakes abounding in game fish, writes B. Stone Kennedy, editor of Western Fisheries.

Dr. Frank N. D. Buchanan, leader of the Oxford Group movement, is expected to launch another campaign in western Canada this Spring, commencing at Winnipeg May 1, taking in Regina, Saskatoon, Calgary, Edmonton, Vancouver and Victoria, and culminating with a selective "house party" at the Banff Springs Hotel early in June.

The success of low cost all-expense tours in the Canadian Rockies instituted by Canadian Pacific Railway last summer has prompted the company to repeat these four, five and six-day trips during the coming summer. Each trip affords 126 miles of motor-ing, and can be made either east-bound from Field, B.C., or west-bound from Banff, Alberta, at the convenience of passengers.

A. C. Leighton, R.B.A., president of the government art college at Calgary, who will again this summer hold his summer art school for selected students from the Province of Alberta at the Kamankaish Dike Ranch, near Banff, has picked a location surrounded by the most magnificent of Rocky Mountain scenery.

The skunk is not the king of the woods, said George Corcoran, naturalist, addressing the Kiwanis Club at the Royal York Hotel recently. "Hold him up by his tail," said Mr. Corcoran, "and he will become innocuous." He didn't tell the Kiwanis if he had actually accomplished this feat.

Toronto got its full measure of music-makers lately when the most famous handmasters of the continent assembled at the Royal York Hotel for their annual convention. Captain Charles O'Neill was the president and they came from all parts of the United States and Canada.

**"Blue" Spells**

Reduce some women to the penitent shadow of their own smiling selves. Others take the Vegetable Compound when they feel the "blues" coming on. It steadies governing nerves... helps to tone up the general health... gives them more pep... more charm.

**LYDIA E. PINKHAM'S  
VEGETABLE COMPOUND**

### WORLD HAPPENINGS BRIEFLY TOLD

The new Italian 7,000-ton cruiser Emanuele Filiberto was launched recently.

Six Scotch laasses destined to become Canadian brides disembarked from the liner Duchess of York at Halifax recently.

Mrs. John Cherry, aunt of Arthur W. Cutten, Chicago wheat king, is dead at her home at Galt, Ont. Frank L. Cutten, Medicine Hat, Alta., is a brother.

German unemployment decreased last month by 719,588 persons, according to insurance companies, and 674,000, according to employment bureaux.

The Northwest Mounted Police force was established in 1873. It became the Royal Northwest Mounted Police in 1906 and has since been re-named the Royal Canadian Mounted Police.

Jews in various parts of London have appealed to the police for protection against persons who have been covering their houses and shop-fronts with anti-Semitic labels.

Germany is placing extensive orders for airplane motors in England, the Daily Mail reported. Bids were called for and one manufacturer alone received an order for 180 motors.

One of the largest sums ever received as "conscience money" came to Hon. R. C. Matthews, minister of national revenue, in the form of a bank draft for \$5,400. The letter containing the draft was postmarked Montreal.

Firing of the royal salute by cannon on land and answering barrages from the guns of the warship Rochester, marked celebration April 24 of the centenary of St. Helena, the lonely little isle in the South Atlantic, as a crown colony. Napoleon died there in exile in 1821.

**Some Idiotic Comments**

#### Craze For Needle Threading Is Most Foolish One Yet

We are told by the ladies who write pieces for the paper that the needle-threading craze has reached Vancouver.

This entertaining form of folly consists of an open competition in which the contestants vie with each other in seeing which one can jam the most threads through the eye of a needle.

We have had successfully danced marathons, rocking chair marathons, big-calling contests, rolling pin marathons, flagpole sitting, piano-playing marathons and even liars' contests.

But we respectfully submit that this frenzy for threading needles is the most asinine one of the lot.

Idiotic contests seem to be in our blood. We just can't shake them off. So let's establish another one.

Instead of competing with each other to see who can dance longest or call a hog the loudest, why not compete to see who can devise the nuttiest kind of a contest to keep the other nuts busy? Vancouver, Sun.

**Perils Of Seafarer**

Deaths through violence are 430 per cent. higher among sailors than in other groups. M. J. Jacobs informs us, states the Los Angeles Times. He also gives us the startling statement that going to sea in modern ships is no safer than in the days of the Phoenicians, 2,600 years ago, when crude wooden shifts were used.

### IT'S LIVER THAT MAKES YOU FEEL SO WRETCHED

#### Wake up your Liver Bile

##### No Calomel necessary

For you to feel healthy and happy, your liver must pour out bile into your bowels, every day. Without that bile, trouble starts. Pimples, indigestion, nervousness in the body. General weakness. How can you expect to clear up a situation like this completely, with more bowel-moving pills, oil, mineral water, laxative candy, enemas, or purgatives? They don't wake up your liver.

You need Carter's Little Liver Pills. Purely vegetable. Safe. Quick and sure results. Get them by name. Refuse substitutes. 25¢ a box, all druggists.

**Precious Glass Of Water**

University of Michigan Values It At Ten Thousand Dollars

The most precious glassful of water in the world—\$10,000 worth—is under lock and key in the University of Michigan laboratories, guarded as jealously as radium.

It is "heavy water" in its pure state deuterium oxide, discovered two years ago and valuable in the treatment of cancer. Profs. J. C. Halford, Leigh C. Anderson and John R. Bates have worked out a plan to increase the university's valuable supply to two quarts within two years.

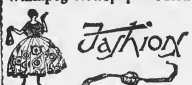

A report on the process was given at the meeting of the American Chemical Society in St. Petersburg, Fla. Prof. Halford hopes that the water may some day prove valuable in curing the ailments of old age.

**Revenue From Smokers**

Millions Paid To Government In Taxes On Tobacco

Consumption of Canadian cigarettes increased during the past fiscal year compared with the year before. The total entered for consumption for the first 11 months of the past year was 4,017,674,385, according to a return tabled in the House of Commons. For the entire fiscal year 1932-33 the total was 3,728,832,089.

Smokers in Canada altogether paid into the revenues of the Dominion during the 11 months of the past year \$24,524,362 as imposts on tobacco in its various forms, with the duties on cigarettes supplying about two-thirds of this total.

**Winnipeg Newspaper Union**

By Ruth Rogers

It has been known for centuries that the air contains at least two components, an active and an inactive one. More than a thousand years ago the Chinese called the active part *yoxygen*. They discovered that this active gas combined with sulphur, with charcoal, and with some of the metals. The inactive part is nitrogen.

Experiments show that approximately one-fifth of the air is made up of this active gas known as oxygen. This element not only occurs in the air but is found most abundantly combined with other substances. It comprises nearly 50% of the earth's crust, about 88% of the body, 65% of the human body, and a very large part of such substances as saltpetre, limestone, brick and mortar.

Oxygen is a gas without color, taste or odor, lighter than air and would be unsuitable for filling zeppelins. It is a very slightly soluble in water, 100 cubic feet of water dissolving only about 4 cubic feet of the gas under ordinary conditions. There is, however, enough of the gas dissolved in water to supply the needs of fish, which are cold-blooded.

This gas does not burn itself, but it supports burning or combustion. It combines with a large number of other elements. This tendency is not very great at ordinary temperatures, but at higher temperatures oxygen reacts very vigorously, usually giving off heat and light. The substances produced when elements combine with oxygen are known as oxides, and the process is called oxidation. Many oxides occur in nature as valuable minerals and ores.

Oxygen is not only the most abundant element but the most useful, because fire, heat, and light are largely dependent upon it. Considerable quantities of oxygen are used for cutting and welding metals by the oxy-acetylene blow torch. Oxygen in tanks is used to restore the supply in the air of submarine boats. It has been found that aviators who ascend to high altitudes, where the air is thinned, get only half the usual amount of oxygen and so become "dopey." An equipment has been designed to supply the oxygen from a tank through a connecting tube to a face mask covering the mouth and nose.

Physicians sometimes use oxygen tanks for patients who are suffering from pneumonia or influenza.

It is another little dress that you can slip into in the morning and wear right through an entire day. You will see here are very modish sleeves cuffed in a most attractive manner. The neck is becomingly draped. And the skirt pointed at the front to give you a tall graceful appearance.

Later for frankly hot summer wear, you can make it with short sleeves as in web sketch. There are numerous fresh washing silks for your choice, handkerchief linen prints and lovely cotton prints.

Style No. 696 is designed in sizes 14, 16, 18 years, 36, 38 and 40 inches bust. Size 16 requires 2½ yards of 39-inch material.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

**Gardening**

Early Planting Usually Ensures An Early Harvest

Now that May has arrived it should be fairly safe to try a few rows of those vegetables which are not usually sown until later. If frost does come along, there is a small loss as the ground can be used over again, whereas if the stuff pulls through there is the satisfaction of having from one's own garden, vegetables unusually early. Beans, potatoes, corn, tomatoes and a few of the other tender and semi-tender vegetables can be treated in this way.

With hardy sorts like spinach, radish and lettuce, one can make the first sowings just as soon as the ground is fit to work. Frost may hold them back but it will not hurt them. Handle the end of the planting season in the same way, that is, make a sowing or two after the usual time for planting, so that there will be stuff coming along weeks after the main crop has been picked.

Some people desire to include some fruit with the garden. In the prairie provinces or Northern Quebec or Ontario, there are some new hardy types as well as good crabapples available. Among sweet cherries, Windsor, Bing and Tartarian are recommended, while Montmorency and Early Richmond are standards of the other type. Plums are grown almost anywhere in Canada, as well as currants, raspberries, strawberries, blackberries, thimble berries, logan berries, and gooseberries.

There are few gardens, indeed, where one cannot work in screening material to advantage. Even if there are not dog kennels, chicken runs and telephone poles to be hidden, the general lay-out is improved where all is not visible from one point. Of course permanent screens are only produced by the use of perennials, such as evergreens, shrubs and long-lived climbers. But quite satisfactory results can also be secured by selecting the right type of annuals. For instance, African Marigolds, Cosmos, Ornamental Sunflowers, Larkspurs, Castor Beans, and other bushy, fairly tall plants will make satisfactory screens by early July. Among the climbers of an annual nature there are Morning Glories, Nasturtiums, Sweet Peas, Hops, and Scarlet Runner Beans.

The old gardener was right in planting peas early. Like the flowering kind it does not seem as if the garden variety can be put in too early. Invariably the biggest crops are produced by the early sown rows. On this account it is best to plant all the peas about the same time, and that is just as soon as the soil is fit to work. To be on the safe side, in those parts of the Dominion where late and very heavy frosts are liable to occur it might be well to put half the peas in on the first possible sowing date and the remainder about 10 days later. Where the climate is mild and the growing seasons goes into late September sometimes a fall crop can be harvested from July to August sowing. To ensure a long harvesting period, and with a vegetable like this the season cannot be too extended, it is advisable to sow early, medium and late varieties. The first sorts are ready in about 50 days while some of the later ones do not start coming on until a fortnight later. The taller, large podded sorts are generally considered the sweetest and best, but they take up more room. For best results they should be provided with brush or strings for support or can be sown broadcast. Peas, like corn, have a flavor all their own when cooked within an hour of picking.

"Is that pointing intended to be a picture of a sunset or a sunrise?"

"It must be a sunset. I knew the artist, and he never got up in time to see a sunrise."

The man who has to say "I am a gentleman," isn't.

Two cups of mashed potato add one-quarter cup heavy cream, 1 teaspoon onion juice, 1 beaten egg yolk, 1 teaspoon sugar, salt and pepper to taste. Beat until light. Form a ring of this on a shallow buttered baking dish. Fill centre with cooked peas and carrots seasoned with sugar, salt and pepper. Dot potatoes with butter. Bake just long enough to heat thoroughly and lightly brown potato.

**Banns Instead Of License**

"Depression Practice" Cost Alberta \$9,000 Last Year

Hamilton (Ont.) is not alone in its loss from marriage license revenue. The same condition exists in Alberta, and it cost the province \$9,000 in 1933 because young couples had their marriage banns announced in church rather than pay the \$6 license fee.

"All denominations are doing it now," said Donald Mackie, provincial statistics registrar. Hamilton city reported revenue loss of \$1,000 because of the "depression practice."

Puffins shed the outer covering of their bills every fall.

**SUNDAY SCHOOL LESSON**

MAY 6

**JESUS ACCLAIMED AS KING**

Golden Text: "Wherefore also God highly exalted him, and gave unto him the name which is above every name." Philipians 2:9.

Lesson: Matthew 21:1-16.

Devotional Reading: Hebrews 1: 8-12.

**Explanations And Comments**

Preparations for the Triumphal Entry, verses 1-8. When near Bethphage, not far from Jerusalem, Jesus sent two of his disciples on ahead to find in the village an ass tied, and a colt with her, which they were to loose and bring to him. If the owner objected, they had only to say "The Lord hath need of them," and he would allow the animals to be taken. Matthew added that this was done in fulfillment of the prophet Zechariah's words (12:14-16).

"As plainly as the crowing of a new monarch and the flourish of trumpets and the kissing of his hand by the great officers of state proclaim him king, so unmistakably does our Lord by riding into Jerusalem on an ass and by accepting the hosannas of the people proclaim himself the King promised to men through the Jews, as the King of peace who was to win men to his rule by love and sway them by a Divine Spirit." (Marcus Dods)

The man who owned the colt and led the disciples take it for Jesus' use, was a better follower of the Christ than many of those who acclaimed him at his triumphal entry of Jerusalem. Deeds often show the state of the heart better than words. Loyal service is better than hosannas.

The Triumphal Entry, verses 7-11. The disciples followed instructions and brought the ass. They put their loose outer robes upon it for Jesus to sit upon, and the multitude with them spread their garments in the way or cut branches from the trees and spread them down for Jesus to travel over. "Some have ridiculed the idea of spreading them down for Jesus to travel over. 'Some have ridiculed the idea of spreading branches on the road as offering incredible obstructions and dangers; and yet the orthodox custom in Russia, in a funeral procession, is to spread the route with branches of fir' (W. A. Grist). Because of John 12:13, it has been generally supposed that the branches were palm branches, although John only mentions the fact that the people came out from Jerusalem to meet Jesus, bearing branches of palm. We know from Revelation 7:9 that palms were carried as symbols of victory and rejoicing.

John tells us that many people, excited by the news of the raising of Lazarus (which he records), hurried from Jerusalem to meet and do honor to Jesus, while following with Jesus was this other multitude of Galileans on their way to Jerusalem to keep the Passover. Both crowds united in crying: "Hosanna to the Son of David!"

**Recipes For This Week**

(By Betty Barclay)

**CARAMEL BON BONDS**

½ cup sweetened condensed milk which has been caramelized  
3 cups confectioner's (very fine ground) sugar  
1 teaspoon vanilla  
1 cup thickened coconut or chopped nut meats

To caramelize, place a can of sweetened condensed milk in a kettle of boiling water and keep at boiling point for three hours. Be sure the can is kept covered with water. We can prepare several cans at a time and open them from week to week as desired. Open up the can of caramelized sweetened condensed milk and blend the contents with sifted confectioner's sugar. Add vanilla. Drop by teaspoonful onto toasted coconut or chopped nut meats. Form into patties or balls. Chill in the refrigerator.

**POTATOES, PEAS AND CARROTS**

To two cups of mashed potato add one-quarter cup heavy cream, 1 teaspoon onion juice, 1 beaten egg yolk, 1 teaspoon sugar, salt and pepper to taste. Beat until light. Form a ring of this on a shallow buttered baking dish. Fill centre with cooked peas and carrots seasoned with sugar, salt and pepper. Dot potatoes with butter. Bake just long enough to heat thoroughly and lightly brown potato.

**Heavy Tourist Trade**

Estimated American Spend \$77,250,-

000 In Canada In One Year

Travel between the United States and Canada is greater than over any other international boundary in the world, according to a return just issued by the Canadian government dealing with the tourist traffic of Canada. During 1933 the number of automobiles from the United States which entered Canada for touring purposes was 3,090,887. Of these, 2,233,418 were admitted for a period not exceeding 24 hours, 663,130 for a period not exceeding 40 days, and 333 for a period not exceeding six months. From information received from various sources including co-operation with United States officials it is estimated that the average expenditure per car in the 24-hour class was \$7.08, in the 40-day class, \$28.80; in the six-month class, \$224.07. Total expenditures by visitors by automobile from the United States during the year are placed at \$77,250,000 in Canada funds.

## Quick Relief Now From Neuralgia

JACK, I'M TO SEE CLARK ABOUT THAT BIG ORDER IN 40 MINUTES AND I HAVE TERRIBLE NEURALGIA. WHAT CAN I DO?

DON'T WORRY! GET SOME ASPIRIN - TWO TABLETS WILL STOP THAT PAIN IN A FEW MINUTES.

WELL, JACK, I GOT THE ORDER! YES, FELT IT AS A PIDDLE.... YOU BET, I'LL ALWAYS GET ASPIRIN WHEN I WANT QUICK RELIEF FROM PAIN.

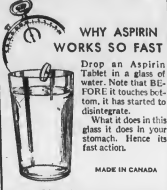

Real ASPIRIN Starts Taking Hold in Few Minutes

Now comes amazingly quick relief from headaches, rheumatism, neuritis, neuralgia... the fastest safe relief, it is said, yet discovered.

Those results are due to a scientific discovery by which an Aspirin Tablet begins to dissolve, or disintegrate, in the amazing space of two seconds after touching moisture. And hence to start its quick hold of pain a few minutes after taking.

The illustration of the glass, here, tells the story. An Aspirin Tablet starts to disintegrate almost instantly you swallow it. And thus is ready to go to work almost immediately.

When you buy, though, be on guard against substitutes. To be sure you get ASPIRIN's quick relief, be sure the name Bayer in the form of a cross is on every tablet of Aspirin.

Does Not Harm the Heart

## OCCASIONAL WIFE

By EDNA ROBB WEBSTER  
Author of "Joretta," "Lipstick Girl" Etc.

### SYNOPSIS

Camilla Hoyt and Peter Annon, young and in love, marry secretly, deciding to live their own lives apart until Peter is able to provide for her. Peter is a young, struggling sculptor trying to win a competition for a scholarship abroad and Camilla is an adopted daughter of a wealthy family. She is not to inherit money when she comes of age and so is studying commercial art in the hope of landing an agency job. Others in the story are Avis Worth, another wealthy girl who is trying to win Peter, Sylvia Todd, Peter's model, and Gus Watson, his former room-mate. At a party at an exclusive club Peter entertains Camilla's guests with impersonations. When the rest of the members of the party go to a cabaret to continue the fall, Peter and Camilla slip off to the beach by themselves and fall asleep on the sand. When they awake it is early morning and Avis and another boy are standing near them. This makes it necessary for Camilla to announce before the party that she and Peter are married. Bowman and Weeks, an advertising agency, where Camilla has submitted work and is going to send for her and offer her a salary of \$50.00 a week to start and a prospect of having it doubled. She tells Peter of this and he, too, is informed that Camilla has obtained work and is going to leave the Hoyt household. Avis Worth rents a studio on the same floor as Peter, and she and he have lunch there. He accepts reluctantly, but is favorably impressed with his visit. Camilla urges Peter to accept some of her earnings to help him along, but Peter refuses and they quarrel. After Camilla has gone from the studio, Avis Worth comes and persuades Peter to accept a loan of \$10.00.

(Now Go On With The Story)

### CHAPTER XVI.

Camilla told Rose then of the disagreement between Peter and herself. She found some relief from her confidence in a sympathetic listener. Rose nodded soberly. "I expected it. You might have known it would not work out."

"But, Rose, if this way doesn't, what would? It seemed to be the best plan in every way."

"The best plan would have been to wait until Peter was established before you married," emphatically.

"But that might be for years. And we love each other."

"Sure, that's just the trouble, no matter what class the man is in or whether it's a case of love or duty. The next best thing in your case would have been for you to let Peter take care of you and make the best

lease the downstairs lock, and was coming in the hall waiting when he reached the top of the stairs. His long legs always scored less than two or three steps at a time.

He took both her outstretched hands and kissed her eagerly, drawing her into the room. "Darling," Peter, "I'm so glad to see you!" she whispered.

He tossed his hat onto a table and looked around. "Hello, Rose. Am I intruding?"

"Not at all. I'm tickled to death you came. I wanted to go out home and see Ma tonight, but Camilla did not feel like going and I didn't want to leave her alone. Now I can run along."

"Why, you never said—" Camilla began.

"Of course not. I knew you would insist on staying alone. I'd rather not come back tonight, either. Can't you stay, Peter?"

"Why—if Camilla wants me."

"Well you can stay with me. I think I know what the answer will be," she said roughly. "I won't be back, anyway. I'll take my slip out and sew the button on the machine. That will be much better and save me a lot of time." She was collecting her things as she talked. She stood before the mirror and adjusted a red beret over her soft black hair, buttoned the collar of a tweed coat under her chin. "Chilly out, isn't it?" she asked Peter.

"Rather," he replied. "You don't mind going out alone?"

"I should say not! It's early yet. Well, goodbye, you two! See that you treat our guest right," she admonished Camilla with a shy wink.

"Oh, sure, dear," said Peter, who she had gone. "Too bad she hadn't a chance like you."

"I don't know. In many ways, Rose is wiser than I. I envy her sometimes."

"Camilla, I came to apologize for the other day. I'm terribly sorry," he confessed.

"So am I, Peter. But that's all over. Let's forget it ever happened."

She was in his arms, with her arms around his neck, close.

"My precious! I wish it hadn't happened. But we'll start all over again, just as if it hadn't. Except please, dear, don't say any more about—that." Which is the way men apologize and repent, with no retractions or concessions. They may regret what has happened, but somehow the woman is still wrong in their opinion.

"But like all women in love, it was enough for Camilla that he once more held her close instead of drawing away from her, that his eyes looked deep into hers with confidence.

"It was I who had the black-blues that time. I haven't felt so low as long as I can remember. But everything is going to work out all right, somehow." His optimism was a happy surprise to Camilla. Hereafter, it had been she who encouraged him. This mood must be the rebound from the depths of his recent despair. It was so delicious to relax in his arms and in the buoyancy of his mood.

"You just forgot that the kind of thing you are doing can't be accomplished in a minute. And the last things in life always take time to accomplish."

"I don't mind waiting for a reasonable time, but I get punky some times when I think about some of the old boys of the past who had to die before the world would recognize them. I may not be a genius in their class, but look at the fellows like Faquhar. He died penniless and writing a play that has survived for two centuries."

"Tell me about him. I don't know the story," Camilla prompted.

"His story fits plenty of others like him. But he wrote his masterpiece on his deathbed, when he knew he was doomed to die, and in extreme poverty. The play was a tremendous success from the first, but he lived for only a month after the premiere. Imagine the irony of that audience roaring at the humor of his play while he suffered the last agonies of a slow death. And the play is still a success just revived in London last season and made such a big hit that they're bringing it to America. Such a farce."

"But, darling, genius gets a better break these days than it did two centuries ago."

He nodded. "That's what makes the struggle worse while that, and hoping that even if I'm not recognized while I'm living, I might produce something that would add to the beauty of the future. Sculpture is more enduring, at least, than a book or a picture that can be hidden away or lost."

Had Camilla known what power sustained his hope and confidence, she might have been less hasty in sharing it. But she supposed that Peter's naturally buoyant nature had righted itself in his conviction over

## 3 MONTHS ON BISCUITS AND MILK

### Woman's Digestive Troubles

Everyone who is subject to any form of indigestion should know of the wonderful experiences. Advice from one who has had such severe attacks is advice worth having. She writes:

"I suffered from indigestion, gastritis and constipation, and was so very ill, I had (on medical advice) to live on soda biscuits and milk for three months. Well, a friend advised me to take Kruschen, and now I am pleased to say my troubles are ended. I can eat and enjoy a good meal without any painful after-effects, my skin is clearer—in fact, quite clear—and there is no sign of constipation. I would advise anyone suffering the same to take Kruschen."—(Mrs. M. R. L.)

The immediate effect of the six salts in Kruschen is to promote a natural flow of the digestive and other vital juices of the body. Soon after you start on Kruschen you will find that you are able to enjoy your food without any distressing after-effects. And as you persevere with the "little daily dose," you will see the relief which Kruschen brings is lasting relief.

their quarrel, and that he had worked out his problem to satisfy his own peculiar pride. She did not know that he had dined that evening with Avis, and had brought away with him some of her faith in himself and her own ultimate victory.

She was to discover in the days which followed, that if you once put love away for even a little while, and then take it out again, it is never the same. It is like a flower that is so fragrant and beautiful that you want to keep it forever and put it away between the pages of a book to treasure with memories; but when you take it out again, it is not at all the same gorgeous thing that you once had in your hands.

(To Be Continued)

### Forgot His Haughtiness

New York Hotel Doorman Took Tip From Scrubwoman

Anna Golen, scrubwoman, made her grand gesture the other day. Anna was one of 23 New Yorkers who gathered at the Hotel Roosevelt to receive prize awards in the Panama International Sweepstakes. She had entered, and she had won, with three checks, and she would prefer to take her \$3,578 in cash.

Accordingly, Anna was lauded a tremendous load of bills amid great ceremony. As she came through the revolving doors to the street, she encountered a barrel-chested, gold braided doorman who gave her a haughty glance as though to say: "Why don't you use the servants' entrance?"

Anna looked him over coldly. She pulled out her roll of bills. She peeled off a five.

"Here, young man," she said, "Go, get yourself a haircut."

He took it.

### Montreal Cabbies

With the marked decrease in the number of cabbies' licenses issued in Montreal last year, the question of allowing motor vehicles to travel on Mount Royal again looms as a contentious issue.

According to Mr. Lamoureux, who is in charge of the permit department at the city hall, there were only 96 cabbies' licenses which is a decrease of 25, as against the figure for the preceding year.

### Wins Unique Contest

Pipe smokers bestowed their praise on C. F. Joppe, winner of a most unique contest at Calgary. By keeping his lowly comb aloft for one hour and 32 minutes he defeated 185 contestants in a race for a title of sorts. Only one match was used.

### Rheumatism

Is caused by failure of kidneys to remove waste from the blood. Gin Pills relieve by neutralizing this acid and restoring the normal action—see a box at all druggists.

### To Carry Pilgrims

Canard Liner To Make Trip From New York To Buenos Aires Next Fall

A special sailing of the Canard liner, Franconia, at present on her cruise around the world via the Southern Hemisphere, will be made next fall from New York to Buenos Aires to carry pilgrims to the Eucharistic Congress to be held there.

The Franconia will leave New York on September 18th and will call at Havana, Cienfuegos, Port of Spain, Trinidad, and Rio de Janeiro, Brazil, on her way to the Argentine capital, where she will arrive on October 10th.

Here the ship will remain for four and one-half days, serving as a hotel for the passengers and allowing ample time to attend to the ceremonies conducted by the Eucharistic Congress, as well as to enjoy the beauties of the largest city in the Southern Hemisphere, the metropolis of South America, popularly known to travelers as B.A. The city has a population considerably more than Buenos Aires, exceeding Rio de Janeiro by nearly six hundred thousand.

Buenos Aires is a combination of Paris, New York and Chicago. In architecture it resembles the French capital, also in the style of gaiety that makes Paris the mecca for Europeans. In wealth and love of amusement, it is like New York. In industry it reminds the traveler of Chicago, being like the American city, a manufacturing centre. One-fourth of Argentina's population lives in Buenos Aires, the largest Latin city in the world.

A unique feature of Buenos Aires is that it is a paradise for women. Here a woman can consider the fair sex as five to one. Thus the scarcity of women adds to their popularity. With beautiful Spanish or Italian eyes, and a sparkle therein that would do honour to Madrid or Rome, these lovely Argentine women are virtuous princesses. They are not won by mere smiles, as is the case in countries where girls are plentiful.

Buenos Aires is situated one hundred miles up the Rio de la Plata, which river here looks more like a bay, being nearly thirty miles wide. The city is flat, and is between sixty and seventy feet above sea level. The nature of the soil is perfectly flat.

Buenos Aires is modern and attractive in appearance. The cathedral is a masterpiece of architecture. The Teatro Colon is an architectural masterpiece. The Avenida Mayo, the city's main thoroughfare, is declared to be the finest street in the world. Vehicular traffic on the Calle Florida, the city's main thoroughfare, is suspended between the hours of 4 and 7 p.m., making it a safe and fashionable place to stroll.

South America's greatest daily newspaper, La Prensa, is published in Buenos Aires. The building which houses it is one of the show places of the city. Visitors are welcome.

On her northward voyage the Franconia will make return calls at Rio de Janeiro, Port of Spain and Havana, reaching New York on November 4th. The entire voyage will occupy forty-seven days.

The travel arrangements are under the joint direction of Thos. Cook & Son, the American Express Company and the Canard Line.

## HOW TO FIND OUT IF YOU HAVE ACID STOMACH

### HERE ARE THE SIGNS:

Nervousness, Frequent Headaches, Indigestion, Stiffening of Wrist, Loss of Appetite, Mouth Acidity, Sour Stomach, Auto-intoxication.

### WHAT TO DO FOR IT:

Take the new Phillips' Milk of Magnesia Tablets—no taste for treatment as directed above.

If you have Acid Stomach, don't worry about it. Follow the simple directions given above. This small dosage of Phillips' Milk of Magnesia is of use to neutralize the acids that cause headache, stomach pains and other distress. Try it. You'll feel like a new person.

But—be careful you get genuine Phillips' Milk of Magnesia, or Phillips' Milk of Magnesia Tablets when you buy—25c and 50c sizes.

ALSO IN TABLET FORM

Each tiny tablet is the equivalent of a teaspoonful of Genuine Phillips' Milk of Magnesia.

Phillips' Milk of Magnesia

### Little Helps For This Week

"I was afraid and went and hid thy talent in the earth, lo, there thou hast that is thine." Matthew 25:25.

Time was I shrank from what was right.

From fear of what was wrong; I would not brave the sacred fire.

Because the cost was strong.

But now I cast that finer sense And sorest shame aside; Such dread of sin is indecency, Such aim at heaven was pride.

J. H. Newman.

If the really devout man falls into some error he does not fret over it, but rises up with a humble spirit he goes on with his joyous rejoicing. Were he to fall a hundred times in the day he would not despair, he would rather cry out lovingly to God appealing to His tender mercy and pity. The really devout man has a horror of evil, but he has still greater love for that which is good, he is more set on doing right than avoiding wrong. Generous, large-hearted, he is not afraid of danger in serving God, and would rather run the risk of doing His will imperfectly than not strive to serve Him lest he fall in the attempt.—Jean Nicolas Grou.

### New Russian Loan

Big Domestic Loan Running Ten Years Announced By Soviet Government

The issuance of a new domestic loan, aggregating 3,500,000,000 rubles and running 10 years, had been announced by the Soviet government. It will be known as "the loan of the second year of the second five-year plan" and carries the optional choice of either a lottery or interest bearing bonds, which will pay 10 per cent annually.

British Grant For Horse Breeding

The British war office has sanctioned a grant of \$25,000 for encouragement of light-horse breeding this year. A special amount is set aside for native pony breeds, in danger of extinction.

The French knew the Ohio river as "La Belle Riviere."

We are explorers all, with flags unfurled in conquest where we gain our being's springs.

And glimpse the promise of another world, Infinite realm which around our small self sings. How far men journey all earth's ends to win.

But further yet, who thread the maze within?

Unusual But True

So unusual is it to have a no-accident year on streets of large cities that Belleville's record without a fatality in 1933 was so remarkable that it called for a check-up by Chief Kidd for verification of the report. Fortunately it was true. The chief constable was able to notify the registrar of the Motor Vehicles in Ontario that there were no motor fatalities in this city during 1933.

The Isle of Wight last year had more sunshine than in any twelve-month since 1885.

## Personal and Local

Miss Jennie Heilbein was home for the week-end from her school south of Cowley.

Steve Krszwy is improving his home on Sixth street by erecting a neat fence around the lot.

The Journal and Ad. Bulletin welcomes local items and a note left in the post office or a call to Telephone 209 would be appreciated.

Many homes are being improved by the cultivation of gardens, and much time and effort is being expended on this healthful occupation which helps to beautify the town.

Orazio Celli is building a neat cottage on the lot formerly occupied by the Lethbridge Brewing Co. warehouse, which is quite an improvement.

Goodwill is an important factor in developing retail business, and the most efficient way to develop goodwill and interest buyers is by attractive advertising in The Journal and Ad Bulletin.

A number of poems by Peggy Devine are well written for one so young in years, and deal with quite a variety of subjects, indicating an acute power of observation of numerous details that are overlooked even by adults.

That magisterial, "Alice in Wonderland," attracted quite a number of people to Cole's theatre, who were delighted with the talkie of this children's favorite which has delighted countless thousands in many lands.

The path leading up the hill beside Nez Perce Creek to Sixth street has been improved by the removal of stones which rolled down during the winter. People with corns, callouses and bunions particularly appreciate this service.

Cool Creek football team will play against Coleman here on Saturday in a C.N.P. league match. The home team has made a good start with two games to their credit. Turn out and see a good game, as the visitors are reported to have a strong team which will put up a stiff battle. Give the players your support.

Mrs. J. Jackson plans on sailing on July 4 from Montreal for a visit to her old home in Scotland, and Mrs. Fairfull, of Calgary, a former Colemanite, will sail on the same boat. It is 27 years since Mrs. Jackson came from Scotland to Bankhead, where Mr. Jackson had preceded her a year previously. After living for some years at Bankhead, they moved to Bellevue, and in recent years moved to Coleman.

At last Coleman is to have a crest. J.S. D'Appollonia is the designer, and for several days he worked on perfecting it. It will be reproduced in cement and placed over the entrance to the fire hall, the centre piece being a miner's safety lamp, with a circular inscription bearing the words—"Mayor Pattinson and Council 1934." If an electric light can be fixed to shine in the safety lamp, it will be useful as well as ornamental, and give added dignity to the improved municipal building.

While in Ottawa G. Kellock and J.A. McLeod, representing the coal companies here, will interview the commissioner of the R.C.M.P. to press for the stationing in Coleman of a mounted policeman. For several years this had been advocated by the council, the Board of Trade and the coal companies, as it would be far more satisfactory than the existing system of having a daily patrol from Blairmore. Prior to the policing of the province by the provincial police, Coleman had a resident detachment of the R.C.M.P., and local authorities consider it just as necessary now as it was several years ago.
